

Brainstorming & Idea Prioritization Template

Date	1 July 2026
Team ID	—
Project Name	Rising Waters – Flood Prediction System
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member listed ideas addressing the flood-risk-awareness problem without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Sri Ram	ML model that predicts flood occurrence from weather + river + terrain features	Core Prediction	1
2	Sri Ram	Flask web form so residents/officials can enter live readings and get an instant risk result	Web Interface	2
3	Shaik Asma	Show flood probability (%) alongside the Yes/No prediction for finer-grained risk communication	Core Prediction	1
4	Shaik Asma	Dedicated result pages with safety guidance when a flood is predicted	Web Interface	2
5	Sri Ram	EDA dashboard (distributions, correlation heatmap) to explain which factors drive flood risk	Analytics	3
6	Shaik Asma	Compare multiple ML models (Decision Tree, Random Forest, KNN, XGBoost) and auto-select the best one	Core Prediction	1

Step 2: Idea Prioritization

Group No.	Final Idea	Feasibility	Importance	Priority	Selected
1	Multi-model ML pipeline predicting flood occurrence + probability	High	High	High	Yes
2	Flask web app with input form and risk-specific result pages	High	High	High	Yes
3	EDA visualizations (distributions, boxplots, heatmap, pairplot)	High	Medium	Medium	Yes
