

Demonstration of Proposed Features

Date	1 July 2026
Team ID	—
Project Name	Rising Waters – Flood Prediction System
Maximum Marks	1 Mark

This document tracks whether each feature proposed during the planning phase was successfully implemented and demonstrated.

S. No	Feature Name	Description	Status	Demonstrated (Yes/No)	Remarks
1	Dataset generation & EDA	Simulated dataset with realistic distributions plus visualization suite	Implemented	Yes	Shown via static/images plots
2	Preprocessing pipeline	Median imputation, IQR outlier capping, scaling	Implemented	Yes	Walked through notebooks/2_*.py output logs
3	Multi-model training & selection	Decision Tree, Random Forest, KNN, XGBoost compared; best saved	Implemented	Yes	Accuracy comparison chart shown live
4	Home page with model info	Displays active model & accuracy	Implemented	Yes	Demonstrated in browser
5	Prediction form	10-feature input form with defaults/ranges	Implemented	Yes	Live form submission demoed
6	Flood / No-Flood result pages	Probability + guidance shown per outcome	Implemented	Yes	Both outcome paths demonstrated with sample inputs

Feature Implementation Summary

Metric	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
