

Project Demo Planning

Date	1 July 2026
Team ID	—
Project Name	Rising Waters – Flood Prediction System
Maximum Marks	1 Mark

This plan outlines how the Rising Waters team will present the project effectively, covering all key aspects within a tight, focused demo window.

S. No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the flood-awareness gap the project addresses	2	Sri Ram
2	Solution Overview & Architecture	Walk through the ML pipeline and Flask app architecture	3	Sri Ram
3	Live Feature Demonstration — Flood case	Submit inputs that trigger a Flood Chance result	3	Shaik Asma
4	Live Feature Demonstration — No-Flood case	Submit inputs that trigger a No Flood Chance result	2	Shaik Asma
5	Model Comparison & Accuracy	Show accuracy comparison chart across all 4 models	2	Sri Ram
6	Q&A Session	Address evaluator questions	3	Sri Ram, Shaik Asma

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Set context: delayed/generic flood warnings
2	Solution Overview	Highlight multi-model comparison and Flask serving layer
3	Live Feature Demonstration	Both flood and no-flood scenarios, using realistic values
4	Q&A Session	Reserve time for evaluator questions
